Hello everyone! My name is Edgar Joel Rivera Plaza. I am a computer science student with a love for web development. I enjoy coding because it allows me to express my creativity and make things that help people in their day-to-day lives. I have a keen interest in the future of technology and the impact it will have on society. I am currently studying computer science at Universidad Interamericana de Puerto Rico Recinto Ponce. I have had the opportunity to work on some really cool projects like building websites, databases and apps in my years in college. I am a self-taught web developer and computer scientist. I have entry-level experience in HTML, CSS, JavaScript, C++, Visual Basic and Data Base. My hobbies include programming, reading and learning new things. My dream is to work in the tech industry as a web developer and one day, become an entrepreneur.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

Work Experience

Backend Developer

Neodeck Holdings - Ponce, PR
